To the members of the FCC regarding XM satellite radio; 6/1/04

Good afternoon. My name is Celinia Ondeck. I am a registered voter and I listen to XM radio. I would like to express my concerns about this petition: NAB petition 04-160. I subscribed to XM radio cause I am a firm believer in the Bill of Rights. I do not like the slap down regulations the FCC has recently enforced on public broadcasting. I think that the recent enforcement is a strict violation of the first admendment. I SUBSCRIBED to XM radio because I wanted a reminder that we live a democracy and not in a communist or dictatorship country. I listen to all the channels from the BBC to the traffic and weather. I live in the Baltimore region and think that it is fantastic that I can turn the dial and not only hear the traffic for Washington DC, but also for Philadelphia and Baltimore as well. I don't have to listen to a half an hour of commercials and dribble that is played on public radio just to find out whether or not route 95 North is backed up from the tunnel down to Columbia. XM radio is WONDERFUL!!! and in order to listen to them you have to be a subscriber so I honestly don't see how the FCC can possibly take this petition NAB 04-160 seriously. People have a choice and if they choose to subscribe to XM then they should have the availability and right to hear traffic and weather just like anyone who listens to public stations. Thank you for hearing my concerns- please REJECT the NAB 04-160 petition.

Sincerely yours,
A faithful XM listener
celinia Ondeck
